

SIEVI CAPITAL PLC DEFINES THE TURNOVER AND RESULT ESTIMATION FOR 2011

2011-12-21

SIEVI CAPITAL PLC STOCK EXCHANGE RELEASE 21 DECEMBER 2011 5.15 P.M

SIEVI CAPITAL PLC DEFINES THE TURNOVER AND RESULT ESTIMATION FOR 2011

Due to the decline of demand especially in telecom products and partly also in products related to renewable energy the turnover of the contract manufacturing business is estimated to fall a little short of last year's level and to be about EUR 210 million (EUR 219,3 million in 2010). Company estimated earlier the turnover to be on the same level as in 2010.

The operating profit of the last quarter of the contract manufacturing business (Scanfil EMS Oy) is estimated to be slightly negative and operating profit for the whole year 2011 is so estimated to fall a little short of last year's level, but remain however on satisfactory level. Earlier company has estimated the operating profit of the contract manufacturing business in the second half of the year to be weaker than in the first half of the year, yet positive and the operating profit for whole year 2011 is estimated to remain at a satisfactory level.

The net result of Sievi Capital Group also includes income from the investment business. The worldwide decline in share prices will affect the fair value of Sievi Capital's investments in quoted shares and other marketable securities. The net result of the Group will thereby remain clearly weaker than previous year. Company has not earlier anticipated the development of its net result in 2011.

Sievi Capital Group comprises the investment and parent company Sievi Capital plc, and a subgroup called Scanfil EMS Oy, which is engaged in contract manufacturing for international telecommunications technology and professional electronics manufacturers. The objective of the

investment activities is to make the management of the company's funds more effective and productive by diversifying the risks and finding new growth potential.

Scanfil EMS Oy has 35 years of experience in demanding contract manufacturing. Scanfil is a systems supplier that offers its products and services to international telecommunications systems manufacturers and professional electronics customers. Typical products are equipment systems for mobile and public switched telephone networks, automation systems, frequency converters, lift control systems, equipment and systems for electricity production and transmission, analysers, slot machines and different meteorological instruments. The company has production facilities in China, Estonia, Hungary and Finland.

The associated companies of Sievi Capital Group:

Kitron ASA (KIT) (Sievi Capital plc's share of ownership 32,96%) is a listed Norwegian subcontractor, which operates in five different customer segments: the marine and oil industry, basic industry, defence equipment industry, hospital and healthcare equipment industry and data and telecommunications industry. In addition to Norway, Kitron ASA has plants and production in Sweden, Lithuania, Germany, China and, as of the beginning of 2011, also in the United States. Kitron ASA's turnover in 2009 was NOK 1,643.9 million (about EUR 210.5 million).
