How we work

We are a trusted, valued and financially stable partner. Our wide-ranging expertise and our desire to grow and develop along with our long experience ensure success in demanding construction projects.

HTJ's vision is to be the most sought-after partner and employer in the industry.

HTJ's values are keeping our promises, development, perseverance and performance, fairness, commitment.

Building construction

- We master the project management, construction management and supervision of new buildings, as well as renovations.
- Our services include expert and site supervision tasks that cover both civil engineering and building technology work (HVAC).
- Our up-to-date knowledge of different project types, costs and market situation ensures a successful outcome.
- We invest in sustainable construction management and controlled commissioning in our projects.

Kiasma, Senate Properties, Helsinki

InfraCity, Turku Technology Properties, Turku

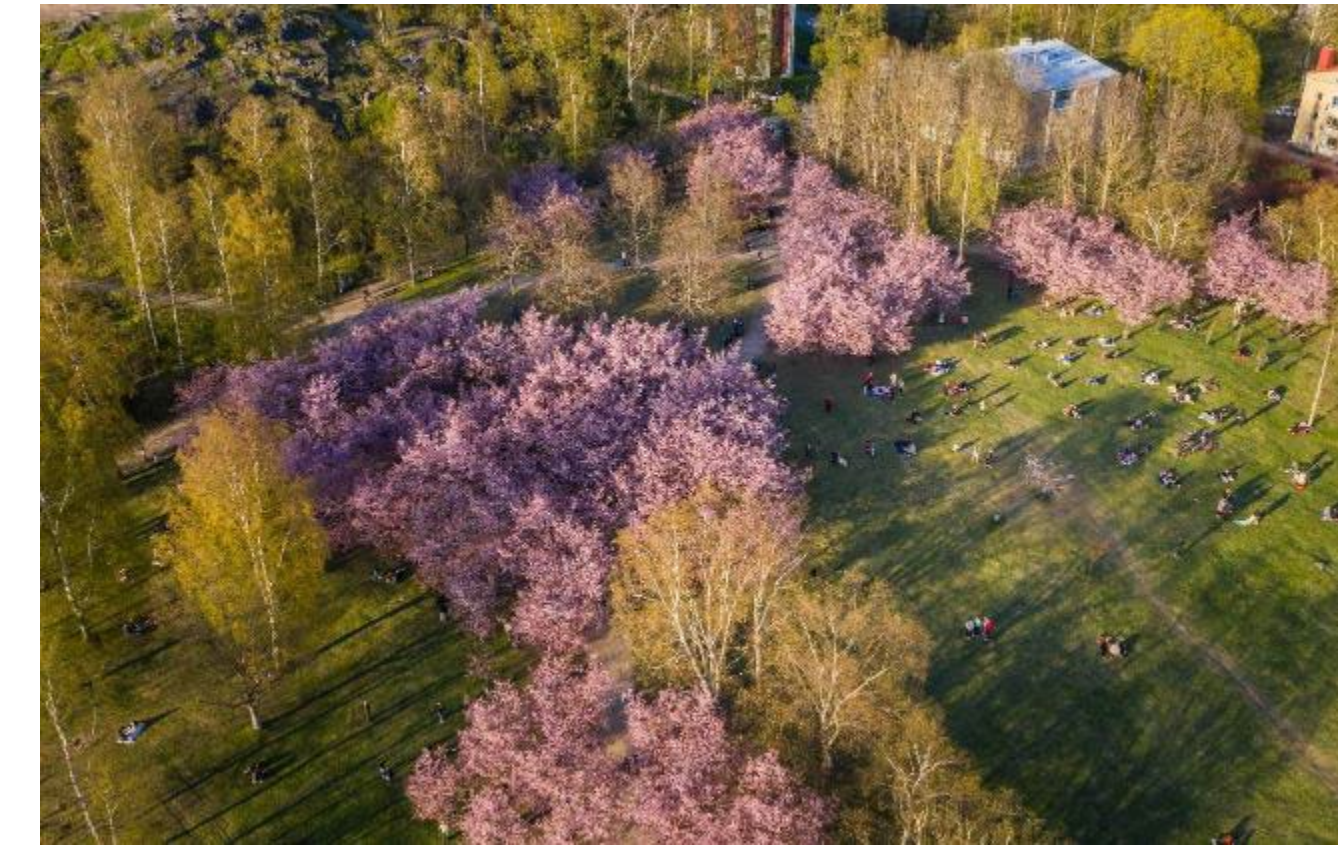

Airport hotel, AVIA Real Estate, Vantaa

Infrastructure

- We offer a wide range of construction management, project management and supervision services in the infrastructure industry, which include, among other things:
 - green and recreational areas
 - transport networks: streets, roads, tramways, tracks
 - waste management and environmental construction
 - water services
 - airports
 - ports
 - engineering structures: bridges, tunnels, retaining walls
- We are a pioneer in using drones in project management.
- In our projects, we take advantage of the opportunities offered by the circular economy and sustainable construction management.

The Crown Bridges, City of Helsinki, Helsinki

The Cherry Park in Roihuvuori, City of Helsinki, Helsinki

The water tower in Hiekkaharju, HSY, Vantaa

Lahti Southern Ring Road, Finnish Transport Infrastructure Agency

Industry and logistics

- We offer comprehensive project management, expert and construction management services for industrial and logistics projects.
- We have industrial customers from several fields, such as the food and manufacturing industries.
- We also have extensive experience in the implementation of logistics terminal and warehouse projects.
- Our special expertise covers various types of logistics services, such as defining in-house logistics and production processes.

Huhtamäki Factory, NREP, Hämeenlinna

Caterpillar Maintenance Center, Kerava

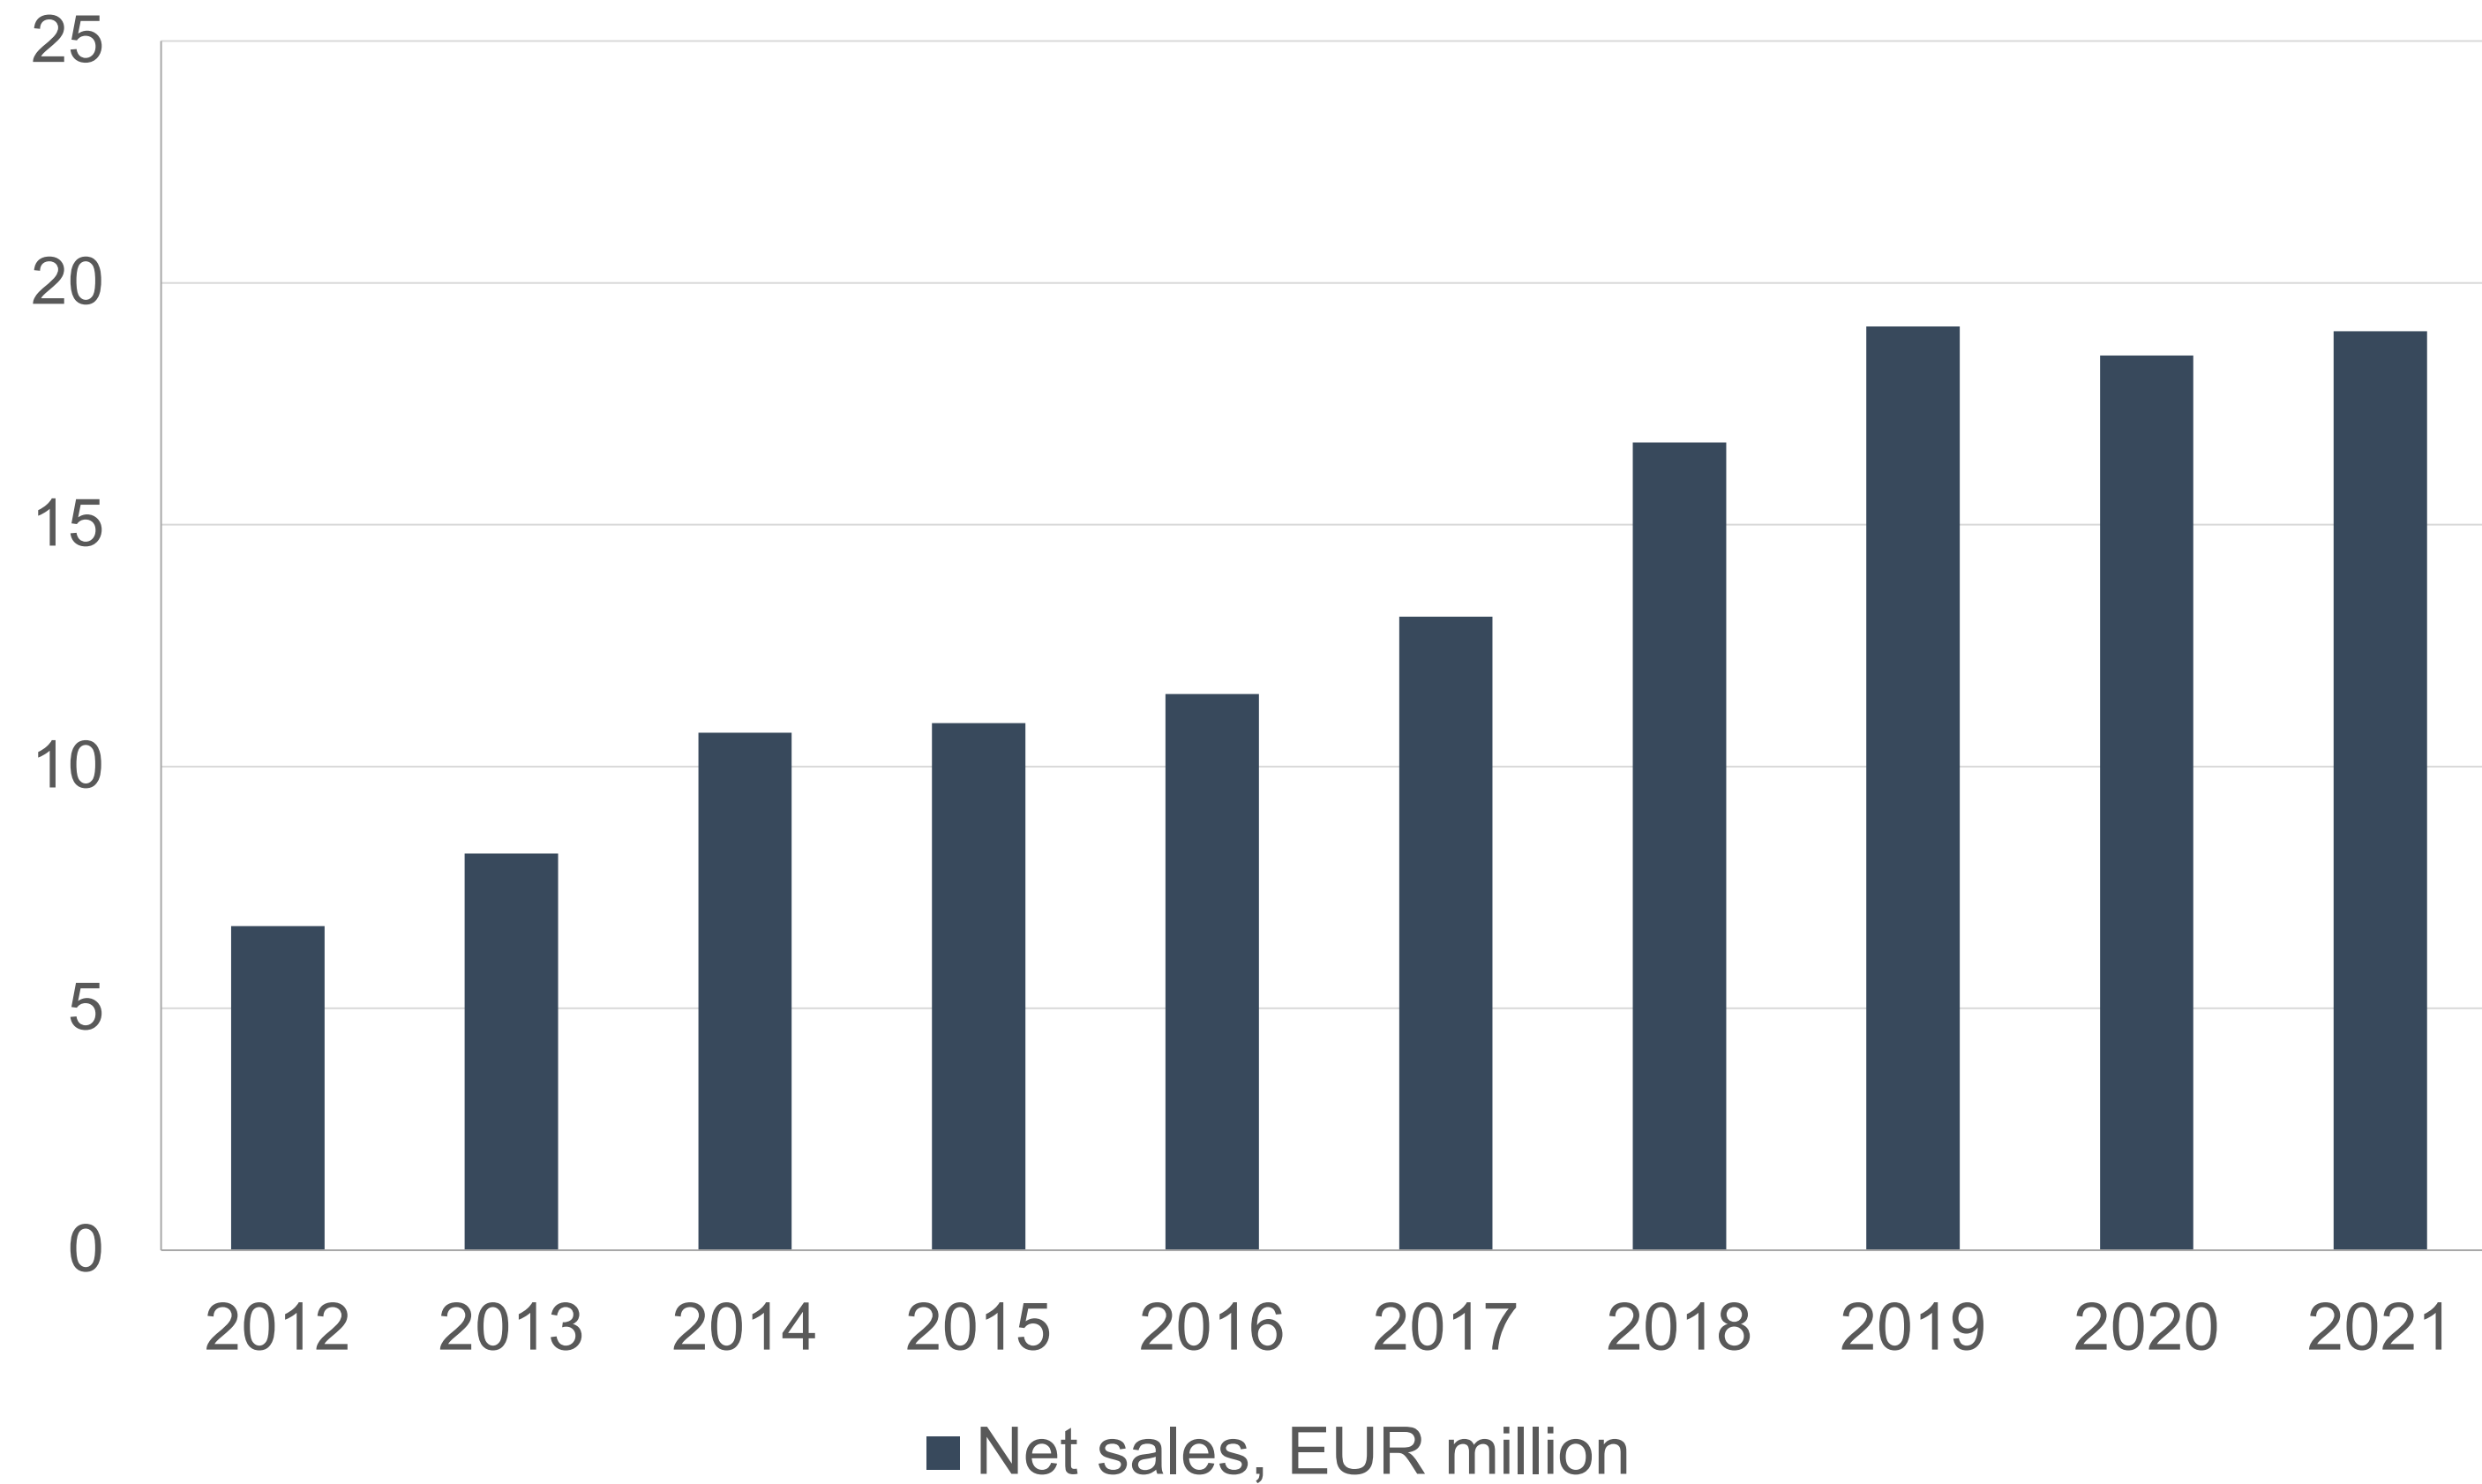

Logistics Terminal, NREP, Kerava

Voikkaa Factory Area, Redeve

Business development

Our target is to grow the business across all sectors by continuing to develop the strong service concept and by investing in recruitment

As part of the strategy, acquisition opportunities will also be actively explored
