Scanfil Group comprises the investment and parent company Scanfil plc, and a subgroup called Scanfil EMS Oy, which is engaged in contract manufacturing for international telecommunications technology and industrial electronics manufacturers. The objective of the investment activities is to make the management of the company's funds more effective and productive by diversifying the risks and finding new growth potential.

Scanfil Group has 35 years of experience in demanding contract manufacturing. Scanfil is a systems supplier that offers its products and services to international telecommunications systems manufacturers and industrial electronics customers. Typical telecommunications products include equipment systems for mobile and public switched telephone networks. Automation systems, frequency converters, lift control systems, equipment and systems for electricity production and transmission, analyzers, slot machines and different meteorological instruments are just some examples of the industrial electronics products we manufacture. The company has production facilities in China, Estonia, Hungary and Finland.
